Lecture Abstracts

The discovery of the "Kunlun stone inscription," along with the ensuing discussions, was one of the most significant cultural phenomena of 2025. This lecture will examine the discovery process, official assessment and recognition, textual analysis of the inscription, references to "herb-gathering" in classical sources and historical examples, and a critical evaluation and refutation of various skeptical or forgery-related claims. It aims to help the audience gain an in-depth understanding of the connotations and significance of the "Kunlun stone inscription" and clarify the historical context of Qin Shihuang's quest for immortality and miraculous herbs.
